

Institute Innovation Council 8.0 - GCEM

Department of Computer Science and Engineering

Our 3rd Year students – Abhishek, Bharath, Nithelan Jaykumar, and Abdul have secured 2nd Prize (₹15,000 cash award) at Vibexathon, a State-Level 24-Hour Hackathon held at Nagarjuna College of Engineering.

A total of 35 teams were shortlisted for the final presentation across the state.

Their project, T7skillup, is an AI-powered career intelligence platform designed to bridge the gap between student skills and industry requirements. The system analyzes resumes, learning progress, and real-world job descriptions using AI to generate a Career Readiness Quotient and a personalized skill roadmap. With features such as a distraction-free learning Chrome extension, real-time skill tracking, and institutional analytics dashboards, the platform creates a structured and measurable learning ecosystem that improves employability and supports merit-based opportunities for students.

This achievement highlights our students' innovation, technical strength, and problem-solving ability on a competitive platform.
